The Role of Patriotic Feeling in Educating Politically Knowledgeable, Legally Literature, Spiritually Mature Young People

Jumaev Jorabek

JDPU, Teacher of the Department of History of Uzbekistan

Received 12nd Oct 2022, Accepted 11st Nov 2022, Online 14th Dec 2022

ANNOTATION

From this article, the author's comments on the role of patriotism in the formation of the life position of young people are presented on the basis of several sources.

KEYWORDS: patriotism, Motherland, national idea, mentality, "mass culture", globalization, geopolitics, national consciousness, duty, independence.

Currently, there is an important criterion that plays a decisive role in the realization of our noble goals in our consistent development along the path of development, and that is the human capital, that is, the human factor, who has acquired modern knowledge and skills, who is able to take responsibility for the future of our country. are our young people who are entering life with bold steps.

It is known that due to the independence of Uzbekistan, our country had the opportunity to build an open democratic legal state and civil society. This determined the consistent implementation of market reforms, their further deepening, and determination to work towards strengthening democratic values in people's minds.

In our republic, the issues of youth education, their level of socio-political knowledge, spiritual and social maturity, especially spiritual education, were scientifically, theoretically and methodologically justified in the Strategy of Actions on the five priority directions of the development of the Republic of Uzbekistan in 2017-2021 [1]. In particular, it was defined as an important issue to educate young people who are physically healthy, mentally and spiritually developed, independent thinkers, loyal to the Motherland, and have a firm outlook on life and increase their social activity.

Today, in the 21st century, which is called the age of information, the age of globalization, the pace of life is changing dramatically. The rapidly changing pace of life has more negative than positive effects on the minds of young people. In order to protect young people from the ideological and ideological attacks of mass culture, which is turning into a limitless danger, it is first necessary to form spiritual and moral education among young people. In this regard, it is necessary to form a historical consciousness in young people, to awaken the spirit of respect for the spiritual and material heritage of their ancestors. In raising them in the spirit of patriotism, it is necessary to awaken feelings of respect for the spiritual heritage of our ancestors [2:464].

After all, the Motherland begins from the threshold, from the corner where a person lives and breathes, from the soil where his navel blood was spilled. Therefore, it is both a duty and a duty for a person to live with love and loyalty to the mother earth, to cherish every inch of her land, and to live with a sense of indebtedness towards her for a lifetime [3:9].

Patriotism is the highest value. Today, we all feel that the mother planet is the only Motherland for all mankind, that keeping it clean and preserving its riches is becoming a matter of life and death for humanity. However, it is difficult to believe that a person who does not love his country and does not value the nation will value others, humanity, and the prosperity of the whole earth. Article 52 of the Constitution of the Republic of Uzbekistan states: "Protection of the Republic of Uzbekistan is the duty of every citizen of the Republic of Uzbekistan. Citizens are obliged to perform military or alternative service in accordance with the law" [4:18].

Events happening in the world in the following decades repeatedly confirm that there is no need to have a serious reason for a coup somewhere. If the forces with malicious intentions intend to do so, stop. Various political tricks and pretexts are found for doing damage. This is the bitter reality of today [5:84]. The Central Asian region is not free from such dangers. Because our land is rich in mineral resources and energy sources, it is located in a very important geostrategic space. Therefore, we cannot be indifferent to the emergence of new threats in our region. Vigilance and awareness are necessary every day, every moment.

Uzbekistan is a country rich in natural resources located in the heart of Central Asia. It has not been long since these riches were used by others without asking us. But there is a compatriot who considers himself to be the original child of this holy Motherland, and now he does not want to deprive others of these blessings. In the development of Uzbekistan, we are achieving great growth rates, results and milestones that attract the attention of others.

"Indeed, where there is peace, there is progress. There will never be development and prosperity in a community that is confused without seeing each other and goes to conflict, as well as in the country. It is necessary to inculcate this truth deeply into our consciousness and not forget its value" [6:30].

Isn't it our greatest responsibility before the Truth to preserve the purity of the Motherland, to protect the Motherland from various malicious intruders, to use all our talents and capabilities to leave a free and prosperous Motherland to the future generations - our children, with a deep understanding of the interests of the Motherland and the interests of the nation? [7:316]

The fate of the reforms being carried out on a large scale in Uzbekistan at the moment and the future of the country are directly related to the socio-political activity of the youth, who make up more than half of the population of the republic, and how much they feel their duty to the Motherland and their patriotism.

In fact, loving the Motherland is a special science that requires a lot of endurance and a very high consciousness, and it is permissible to acquire it starting from the cradle and continuing until the last breath. "Patriotism" means loving the Motherland, then the person who acquires this knowledge will have reached the rank of a perfect person who gave his life to the Motherland. What we have received from the country is a debt, and it is obligatory to repay the debt. Each of us loves the Motherland, because the Motherland is the air we breathe [8:198].

"In the hearts, minds and thoughts of our youth today, it is necessary to inculcate the sacred national pride, the sense of the Motherland, to love a person, his family, his home and neighborhood, the dear place where the

navel blood was shed - the motherland. All of these constitute the content and essence of the Uzbek national mentality," says our respected academic professor A. Askarov.

Inculcating these qualities in the mind of the young generation is a psychologically and pedagogically complex, multifaceted and long-term process, and the most important factor in its solution is the economy. It will be difficult to achieve the desired goal if mass production, which is inextricably linked with the economy, does not rise to its competitive level [9:551]. To inculcate this in the minds of the young generation is the most pressing issue today. The tactical and strategic path of our country and President Sh.M. Mirziyoev is also aimed at this.

Patriotism is a universal virtue. Patriotism also means readiness to fight for the prestige of each country. Every person's noble purpose in life is inextricably linked with the present and future of this country, its true perfection. The development of the country depends on the goals of the children of our country. This is a law that requires each other. Therefore, love for the Motherland should be expressed not only in words, but also in the practical actions and work of each of us. This includes all the things we do for the sake of preserving the wealth of our country and the well-being and peace of our people.

In short, where there is no independent thought, there is dependence, a moral threat. A person with an independent mind will never depend on others. Independent thought is the spiritual path to creativity and innovation. Where there is no patriotism, there is a path to treason. Therefore, regardless of our age, each of us living honestly, being brave and humble, fair, honest and sincere will pave the way for the country's perfection.

President of our republic Shavkat Mirziyoev said, "Today's rapidly changing world opens up new and great opportunities for humanity and youth. At the same time, they are exposed to various evil dangers that have never been seen before. Malicious forces are turning simple, gullible children against their parents, their country, and are taking their lives. In such a tense and dangerous situation, we as parents, teachers, the community, and the community should increase vigilance and awareness in this matter. We should raise our children ourselves, not leave them in the hands of others. For this, we need to talk more with our young people, listen to their hearts, know their pain, and give practical help to solve their problems" [10] makes each of us more responsible and aware. For this, we need to talk more with our young people, listen to their hearts, know their pain, and give practical help to solve their problems" [10] makes each of us more responsible and aware.
